COLLECTION	SPECIAL FEATURE	COLLECTION	SPECIAL FEATURE
 INJECTION SLUB	Injection slub yarn is a specialized fancy yarn made up of two different materials, one for 'Slub (thicker sections along the yarn) Portion 'and the other for 'Base Yarn'. Both being dissimilar in nature, color and character. Slub Portion is injected at random over base yarn.	 JASPE	Resembles Jasper in blending of colors: clouded in streaks of contrasting colours. Two roving are mixed together at ring frame stage to create effect on the final yarn.
 NEPPY	fancy yarn in which small reinforced areas - known as neps - are formed at specified intervals, typically in a variety of colours, to achieve a decorative effect.	 HAIRY	It is a type of novelty yarn. It appears as a thread base, with several long strands spaced at even or uneven intervals that protrude out at an angle from the main strand. The long strands, or hair, can be made of same or different material.
 SNOW	Refers to interwoven yarns of mixed colors producing flecks of an alternate color. It is typically used to mix multiple shades of grey or grey with	 GRINDLE	A two ply special effect yarn made of two different blends, normally contrasting blends to have effect on final yarn.

## SPECIAL FEATURES

Yarns produced with different value added fancy effects making them trend friendly and use of eco-friendly dyes enhances the value of yarn. From the customer point of view the fabrics/ garments made from these yarns are with easy care.
